Patient: Smith, Joseph

Date of Birth: 5/10/50

Date of Imaging: 11/15/00

Reading Physician: Aaron Filler, MD, PhD

Referring Physician: Tim Wilson, MD

This T2 weighted, chemical shift selected Neurographic image depicts the several cervical spinal nerves in the neck. In this patient the right C6 root is hyperintense. There are no evident abnormalities in any of the cervical spinal nerves on the left side. The pair of opposing arrows on the right side above and below the C7 and C8 spinal nerves depicts a downward deviation of these spinal nerves typical of the findings in a scalene syndrome associated with hypertrophy of the scalene muscle. Additionally, arrows on the left side indicate the positions of the C6 and C7 dorsal root ganglia.

This report includes an electronic water mark. Original printed reports include a paper watermark.
